Professional Experience

Autodesk   August 2014 – Present
Front-End Developer

- Focused on front-end development, including design and implementation of client-side data models, views, business logic, and unit tests.
- Involved in the entire product lifecycle from wire framing to rapid prototyping, constant iterations, and into production.
- Created an onboarding program for incoming developers into our platform teams. Included a wiki that oriented new employees to make their onboarding experience smoother.

Education

General Assembly   2014

- Web Development Immersive Program, a 12 week immersive program to gain fluency in full stack web development

California State University of Northridge   2010-2013

- Bachelor's Degree in Political Science
